

# BALER TWINE BIG SQUARE

## BALE WITH ULTIMATE LENGTH AND STRENGTH

Donaghys Crop Packaging provides a full range of natural and synthetic fibre twines for Small Square, Big Round and Big Square baling applications. As demands continue to change, we will always be at the forefront of research and development to provide contractors with high performance twines that meet their requirements.

Big Square Twine is the result of major innovation and development by Donaghys Crop Packaging, to satisfy the demands of both machines and customers. In response, Donaghys Crop Packaging Big Square twines are highly visible, with longer spools to maximise baler machine runnage and reduce downtime in the field.

Advancements in knot strength and ball length mean contractors are saving time and money daily with trouble-free baling.

### KEY FEATURES

- Twine for all applications
- Natural and synthetic fibre twines
- Highly visible
- Longer spools

PRODUCT	WEIGHT PER BALE	COLOUR	APPLICATION
RLINE R2 BALER TWINE 2 x 1200m	20 kg	Red/Brown	HD Big Square
TOP KNOT TWINE 2 x 1100m	18.8 kg	Blue	HD Big Square
DON 480 TWINE 2 x 1220m	19.6 kg	Orange	Big Square
EZYRUN 460 TWINE 2 x 1220m	18.4 kg	Ice Blue	Big Square
DON 440 TWINE 2 x 1300m	18.8 kg	Red/Brown	Big Square

# RLine (R2)

The Rline range of twines replaces the very popular Cobra twines. Rline is the next generation of twine, manufactured on the very latest extrusion lines to give a softer, longer-running twine without sacrificing strength and performance.

Rline R2 twine is specially designed to offer continuous high performance and exceptional knot strength. R2 delivers its best trouble-free baling performance when used in modern, high-density balers such as the Krone Big Pack and Claas Quadrant machines.

- Softer and less abrasive when compared to other twines
- UV-stabilised for New Zealand conditions
- Lower maintenance costs for end users
- Extra length
- Designed for all types of crops, including high density straw, hay and silage

# TOP KNOT

The superior knotting and performance of Top Knot was developed specifically for high-density big square bales. Made from titanium-impregnated, UV-resistant synthetic fibre, this twine is suitable for the strongest of baler applications.

- Superior performance and knotting
- Titanium strength characteristics for the strongest of baler applications
- UV-stabilised for New Zealand conditions
- Ideal for high-density big square balers

# DON 480

Don 480 was designed with the contractor in mind. Featuring a unique combination of extra length and superior strength, Don 480 is ideal for use in all big square balers.

- Outstanding in the toughest field conditions
- Unique combination of extra length and superior strength
- UV-stabilised for New Zealand conditions

BAS2016	DON 480 TWINE 2 x 1220m ORANGE	BALE	48	9421033150813

# Ezy-Run 460

Ezy-Run 460 is designed to dramatically decrease the wear and tear on machinery by up to 50% when compared with harsher twines.

- Designed to be easier on machinery with up to 50% less wear than harsher twines
- UV-stabilised for New Zealand conditions
- Ideal for medium-density, big square balers

BAS4005	EZYRUN 460 TWINE 2 x 1220m ICE BLUE	BALE	48	9421033150844

# Don 440

The first choice amongst contractors, Don 440 was developed for medium density big square balers. Suitable for all makes of machines, Don 440 is the work horse of square baler twines and provides trouble-free baling in all conditions.

- Length prevents time loss in the field
- Smooth and trouble-free baling
