

SEVEN - Stronger and Longer

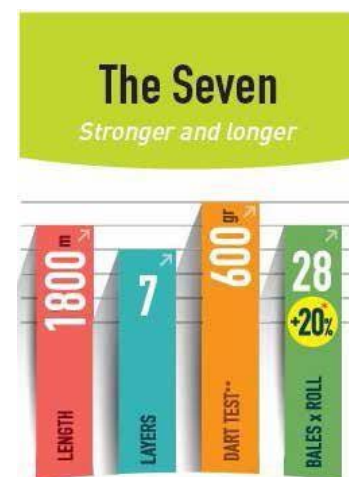

Seven is an economical solution to wrap round or square bales. You can now enjoy a film that is three times stronger than a standard wrap! Seven offers contractors a new level of protection with the peace of mind of achieving performance improvements, much better impact and tear resistance than with standard films.

Seven achieves outstanding results: a very smooth silage wrap that is perfectly adapted to the bale surface, creating a very effective airtight barrier producing optimal fermentation.

BENEFITS

- Three times more mechanical resistance
- Very effective airtight barrier
- 20% extra length per roll
- Cost is reduced by 10% per bale
- Plastic Core
- 22 Micron Thickness
- UV resistance

TECHNICAL INFORMATION

Parameter	Seven	Parameter	Seven
STRESS AT BREAK - MD	≥36	STRESS AT BREAK -CD	≥30
ELONGATION AT BREAK -MD	≥600	ELONGATION AT BREAK CD	≥900
TEAR STRENGTH MD	≥200	TEAR STRENGTH CD	≥680
IMPACT RESISTANCE	≥600
